

Instructions for USB flash disk recording

Note: Before the video recording, make sure the USB flash disk format system is “FAT32”, not “NTFS”

Step 1. Open the tool, enter the camera IP, click on the “Connect” button. (Shown as below)

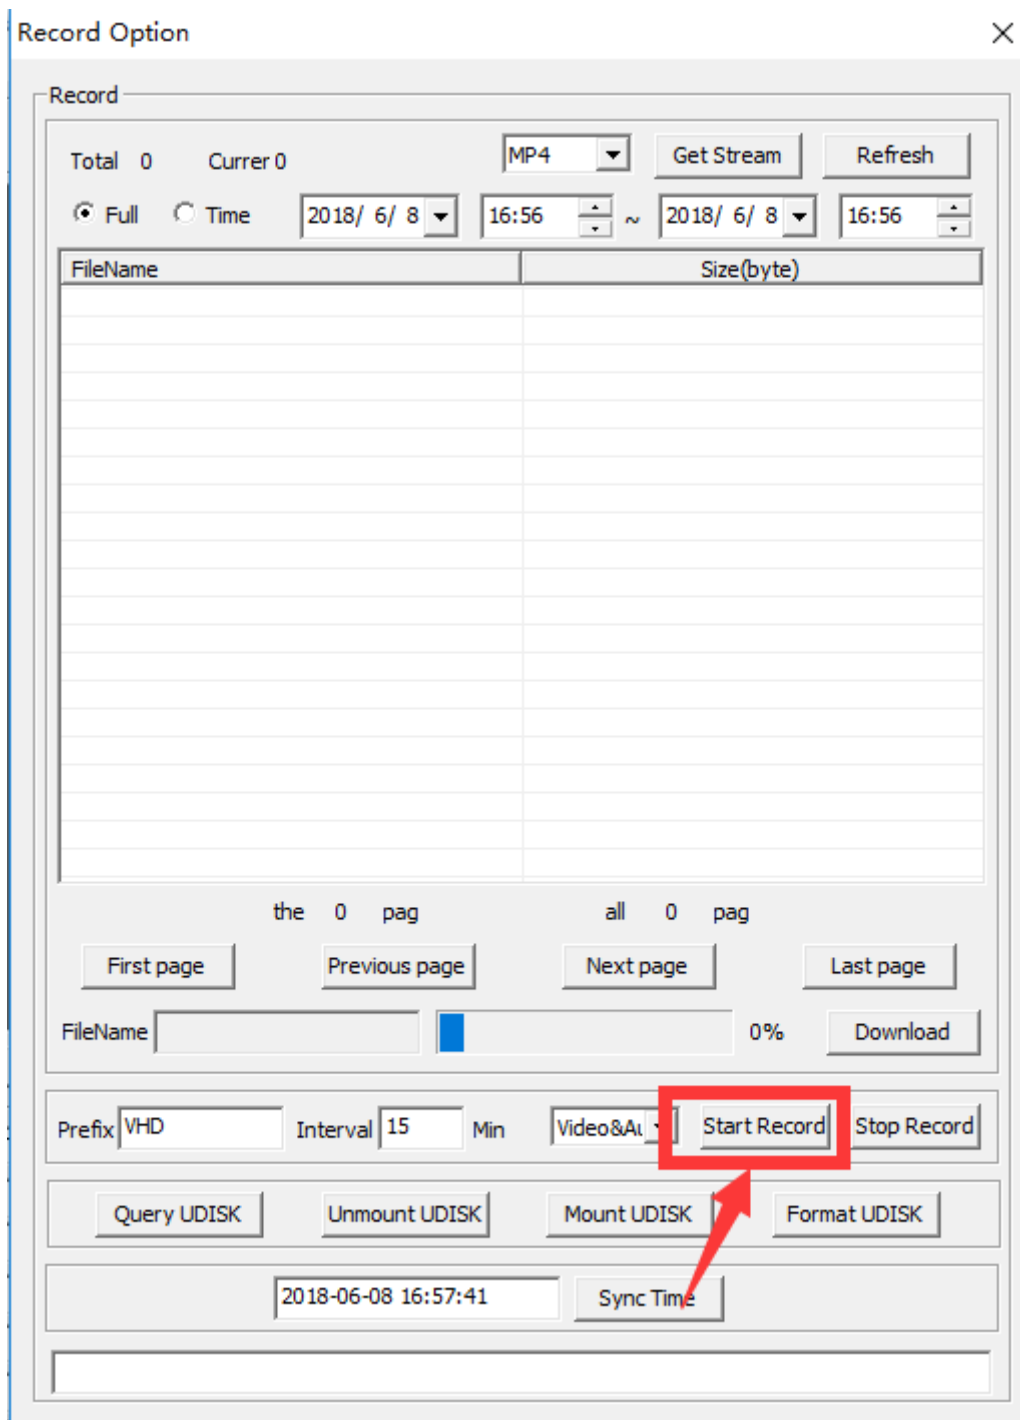

Step2. Click on the “record” button. (Shown as below)

Step 3. Check the UDISK

Click on "Query UDISK", if this step is ok, then click on "Mount UDISK", if message is "mounted", then next step:

Step 4. In the "Record option" window, click on the "start record" button to start the video recording (shown as below pic)

Step 5: for visualizing the recorders, click on "refresh" and "download" you want.
